

**CAPABILITIES OF DANIEL SELIGMAN  
IN THE AREA OF ENVIRONMENTAL MARKETS**

- More than 30 years experience in the area of energy-environment-natural resources as a journalist, research consultant, lawyer and policy advisor.
- Provided legal analysis to electric utilities, business trade associations and state agencies to facilitate market-oriented solutions to natural resource problems.
- Analyzed state renewable portfolio standards and other regional responses in the Pacific Northwest to climate change.
- Evaluated the effects of tax credits to spur the development of renewable energy.
- Monitored the development of renewable energy certificates (“green tags”) for the electric utility industry.
- Evaluated the costs and operational challenges of integrating large-scale wind energy facilities into the existing electric utility grid.
- Analyzed innovative river management and water allocation efforts on major rivers around the world. See publication, *World’s Major Rivers: An Introduction to International Water Law with Case Studies*, posted on the website of [www.danielseligman.com](http://www.danielseligman.com).
- Examined payments for ecosystem and watershed services in the United States and elsewhere.
